

WINDOW TREATMENT SAFETY IS GRABER'S TOP PRIORITY

According to the U.S. Consumer Product Safety Commission, since 1990, more than 200 infants and young children have died from accidental strangulation by window cords. To help prevent tragedies like this, Graber and the Window Covering Safety Council are joining forces to encourage parents and caregivers to make their homes as safe as possible. Keep reading for life-saving information on window treatment safety options, simple safety tips you can apply immediately and a special offer to have your existing window treatments modified for free to meet today's safety standards.

The Window Covering Safety Council urges parents to follow these simple tips to protect their children and pets from window treatment hazards.

- Replace window treatments manufactured before 2001 with today's safer products
- Move all cribs, beds, furniture and toys away from windows and window cords, preferably to another wall
- Keep all window pull cords and inner lift cords out of the reach of children and pets
- Make sure tasseled pull cords are short and continuous-loop cords are permanently anchored to the floor or wall
- Make sure cord stops are properly installed and adjusted to limit the movement of inner lift cords
- Lock cords into position whenever blinds or shades are lowered, including when they come to rest on a window sill
- Install cordless window treatments wherever young children play or sleep to eliminate the hazards of dangling cords and maximize safety

Visit the WCSC website at www.windowcoverings.org for more information.

SPECIAL RETROFIT OFFER

**Retrofit your window treatments for safety —
at no charge to you!**

If you prefer to keep your older window treatments, a free retrofit kit can be obtained to bring these blinds or shades up to today's safety standards. Contact the Window Covering Safety Council (WCSC) toll-free at 1-800-506-4636, or visit the WCSC website at www.windowcoverings.org. CORDLESS AND WAND CONTROL

Cordless lift, wand tilt and wand control are easy and affordable ways to eliminate all dangling cord hazards. Cordless operation also gives your window treatment a cleaner appearance.

CORDLESS BOTTOM UP/TOP DOWN

Cordless bottom up/top down allows you to raise the window treatment from the bottom or lower it from the top without the use of hazardous dangling cords.

CONTINUOUS-LOOP LIFT SYSTEM

A powerful clutch lifts the window treatment and holds it steady without the cord loop changing length, and the included safety tension device keeps the cord out of reach of children and pets.

OPTIONAL SAFETY CORD CLEATS

Optional safety cord cleats keep the cord out of reach of children and pets to eliminate cord safety hazards. Add clear plastic cord cleats at no charge or upgrade to brass cord cleats.

MOTORIZATION

Somfy® motorization makes it easy to raise or lower multiple shades with a hand-held control or wall switch, and it eliminates dangling cord hazards in homes with children or pets.

VERTICAL CELLULAR SHADES

Vertical Cellular Shades feature a push-button design that eliminates cord safety hazards, plus an exclusive safety release stem will make sure the fabric pops out instead of tearing when stressed.
